## Sentiment Strong for Special Session on Smog, Senator Says

By RICHARD RICHARDS  
State Senator

All indications are that the Governor will call a special session of the legislature on the subject of air pollution to run concurrently with the 1960 budget session next March.

There are indications, too, that support for the enactment of smog control legislation on the state level is stronger than it has ever been since this problem reached its present proportions.

All of California's 58 counties have concurred in requesting such legislation, at a special session of the legislature, and many other governmental bodies and private organizations have joined in this request.

ONE SOURCE of air pollution on which we will be in position to act is that of automobile exhaust emissions.

Early in the 1959 sessions I introduced, and obtained the enactment of, an urgency measure directing the State Department of Public Health to determine the maximum allowable standards of exhaust contaminants by Feb. 1, 1960.

THIS WAS done in anticipation of a special session in March of 1960, so that the legislature might have before it a definite set of standards upon which to base further legislation requiring that these standards be conformed to.

We will thus be well prepared in this particular area of air pollution, upon which the counties have put special emphasis.

My own feeling is that there are other steps that must be taken for the over-all control of air pollution, and that these steps should be taken at the same time as we act on the control of exhaust contaminants.

FROM THE beginning of this discussion in the legislature, my own position has been that air pollution should be recognized as a state, and not merely a local problem, and that we should broaden the area of the state's participation in its control.

Generally, I think there are three directions in which the state should extend its authority and its support.

One is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

Another is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A third is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A fourth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A fifth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A sixth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A seventh is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

An eighth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A ninth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A tenth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

An eleventh is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A twelfth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A thirteenth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A fourteenth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A fifteenth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A sixteenth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A seventeenth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

An eighteenth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A nineteenth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.

A twentieth is in the creation of uniform standards for the purity of air throughout the state, and the State Department of Public Health has been directed to do this by legislation similar to my own bill relating to exhaust contamination.
